LEGO® EDUCATION PROGRAM 2016

The new program has been designed in two parts:

- **Science and Technology:**
Students explore the world of powered mechanisms.
- **Creativity and imagination:**
Students engage with LEGO® pieces to complete puzzles, games and challenges without instructions and become Master Builders!

As long serving primary school teachers we believe it is important to use the Australian Curriculum as a guideline to the program.

Key Learning Values:

- Building and exploring real life Machines and Mechanisms
- Investigating powered machines with the motor
- Using plastic sheets for calibration and capturing wind
- Exploring gearing mechanisms with the assorted gear wheels

The 10 week course will begin in term 2, on Wednesday the 20th of April, lunch time, at a cost of \$150 per student. The course will be held at Beaumaris Primary, from 12.55 – 1.50.
