

Visual Arts: Term One 2019

This term our major focus is on the element of **colour**. The students will be celebrating colour in their creations and extending and enriching their work using an understanding of the element of colour in all things.

Some of the concepts the students will explore are:

- Colour and Feeling. Different experiences evoke different emotions and colour has an emotional effect. Students can explore colours they like/ dislike and colours that represent joy, sadness, elation, loneliness, excitement and fear.
- Tones of colours
- Tints
- Graduations of colours
- Primary, secondary and tertiary colours
- Harmonious and Complementary colours
- Natural and man-made pigments.
- Fire/warm and Water/ cool colours
- Rainbow of colours and the colour wheel
- Transparent colours. The softness and subtlety of watercolours.

*“A splash of **colour** will give you waves of enjoyment.”*

— Anthony T. Hincks

*Art has the role in
education of helping
children become like
themselves instead of
more like everyone else.*
